---

## PROFESSIONAL SUMMARY

Junior SOC Analyst with hands-on cybersecurity training and practical experience in security monitoring, log analysis, alert triage, and network investigation. Familiar with SIEM platforms, Linux/Windows environments, Wireshark, Nmap, and security fundamentals. Skilled in Python and Bash for log parsing, alerting, and automation, with knowledge of incident response and MITRE ATT&CK.

## EDUCATION

### Bachelor of Computer Science

Expected: June 2027

Faculty of Computers and Information | Misr University for Science and Technology (MUST), Egypt

- Relevant Coursework: Network Security, Operating Systems, Software Engineering, Data Structures, Algorithms, Database Systems.

## EXPERIENCE

### Summer IT & Telecommunications Trainee

July 26 – August 6, 2026

GUPCO – Gulf of Suez Petroleum Company | Maadi, Egypt

- Completed an intensive summer training program in the Information Technology & Telecommunications Department, gaining exposure to enterprise networking, telecom systems, and IT operations.
- Took part in cross-functional sessions covering cybersecurity, AI fundamentals, and soft skills, including a guided tour of server rooms and data center operations, and delivered a team presentation as part of the program.

### IT Support Intern

July 1 – August 15, 2024

Egyptian Contracting Company | Dokki, Egypt

- Troubleshoot hardware, network connectivity, and system issues across company workstations and network equipment as part of daily IT support operations.
- Assisted in designing and organizing database structures to support internal operations, applying SQL fundamentals under supervision.
- Completed the training period with an excellent performance evaluation from the company's training department.

## RELEVANT TRAINING & COURSES

- Cyber Academy — National Telecommunication Institute (NTI)
- CCNA Training — National Telecommunication Institute (NTI)
- HCIA-Security Training — National Telecommunication Institute (NTI)
- SOC Level 1 — TryHackMe
- FortiSIEM — Fortinet
- FortiAnalyzer — Fortinet
- Linux Essentials — Cisco Networking Academy
- Cybersecurity for Beginners — Mahara-Tech
- Artificial Intelligence — Huawei
- Artificial Intelligence — The British University in Egypt

## SKILLS

- Security Tools: Kali Linux, Wireshark, Nmap, Metasploit, Burp Suite, Packet Tracer, Huawei eNSP, SIEM (Splunk, QRadar, FortiSIEM), FortiAnalyzer, IDS/IPS
- Networking: TCP/IP, OSI Model, DNS, DHCP, VPN, Firewall Configuration, Network Monitoring, Subnetting
- Programming: Python (log parsing, alerting, automation), Bash, Shell Scripting
- Platforms: Linux (Kali, Ubuntu), Windows Server, VirtualBox, VMware, Git, GitHub
- Languages: Arabic (Native), English (B2 – Upper-Intermediate)
- Soft Skills: Teamwork, Problem Solving, Time Management, Communication, Working Under Pressure

## PROJECTS

### Automated Security Alert System

Python, Bash, Linux

- Engineered a Python-based security monitoring tool that parses system logs in real time, automatically flagging anomalous behavior and triggering alerts across multiple log sources, reducing the need for manual log review and simulating core SOC alert workflows.

### Linux Server Hardening

Linux, Security

- Implemented security configurations on Linux servers, including firewall rules, SSH hardening, user access controls, and system monitoring, to reduce the attack surface and strengthen server resilience.

### Website Uptime Monitor

Python, Bash, Linux

- Built a Bash/Python CLI tool that monitors 10+ web services, logs downtime with timestamps, and triggers automated alerts, replicating SOC-level availability monitoring.
